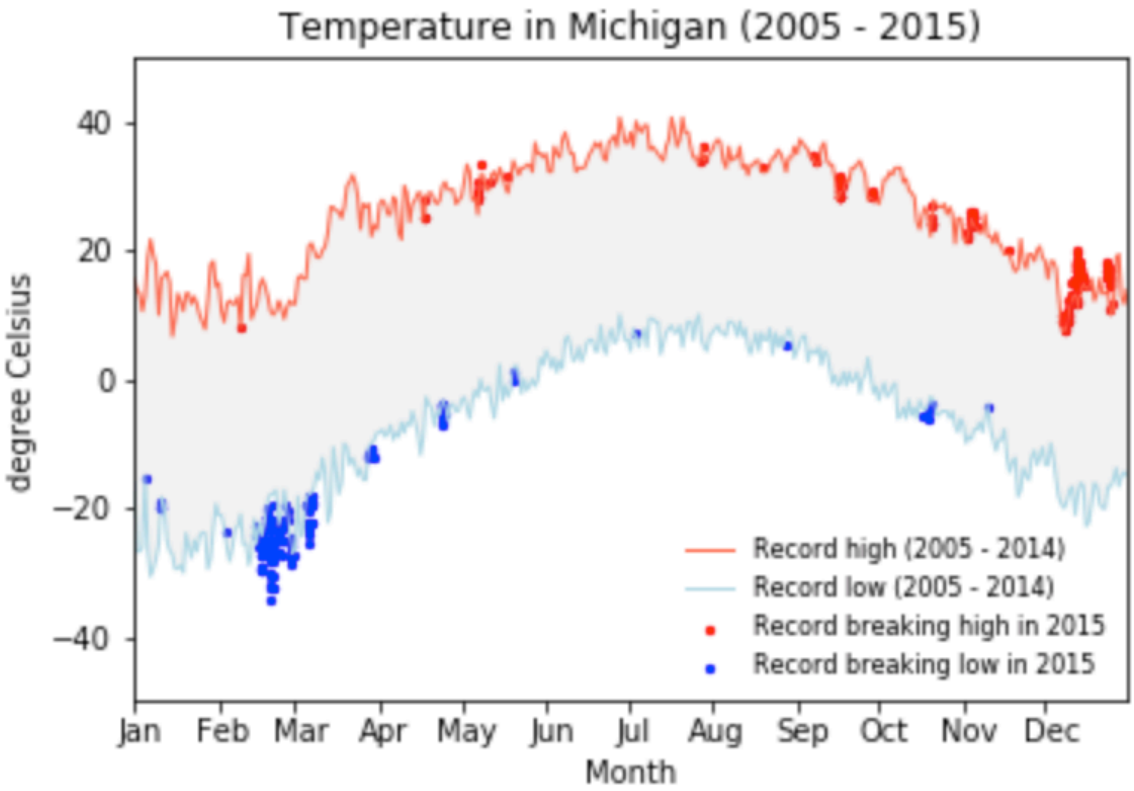
W2

Matplotlib
Three layers:

1. Scripting layer →pyplot
2. Artist layer primitives, collections, containers
3. Backend layer

Assignment:
Title

```
Temperature in Michigan (2005 - 2015)
```



Describe how your visual leverages the guidelines of effective visual design outlined in module one of this course.

```
1. Clear image without unnecessary lines and notations.
2. Limited the range of Y-axis to suit the data's boundary.
3. Used different and familiar colors to mark max and low temperatures.
```
